

**Class Name:** World Geography  
**Grade Levels:** 9th - 12th (High School)

**Teacher:** Trish Akouka

**Class Description:** Can you find Italy on a world map... because it looks like a boot? Be able to find all countries as easily with the Visualize World Geography method. The VWG method replaces the outline of each country with an easily recognizable object, like Italy as a boot. We call these country-objects "pictographies."

This method is fast and long lasting—

Also, by using highly effective mnemonics, or associative clues, presented in an entertaining format, you and your student(s) will AUTOMATICALLY pull up the visual of a country in your mind's eye—its shape, relative size, location, even its bordering countries—whenever you hear or read the name of that country!

**What to expect:** Super FUN and silly way to learn world geography. I used this curriculum with all 3 of my boys and was AMAZED at what they learned!! We will work one day a week in class and expect to do about 1/2 hour - 1 hour each day for homework.

**Author:** Theresa Blain                      [www.visualizeworldgeography.com](http://www.visualizeworldgeography.com)

**Monthly class cost:** \$29.00

**Materials Fee:** \$30.00

**Workbook/Online in class video lessons Fee: \$45.00**

\*When you register for this class, I will get your email addresses and contact you when we get our co-op access code. At that time, you can either pay me the \$45 by PayPal or mail me a check. (Probably the first week of August) Then, I will order all students' workbooks and bring them to the first class.

**FLDOE course code:** 2103300

**Maximum # of students—12**

**Minimum # of Students—5**
