Grade Level: 9th-12th

Course Description: Career Exploration might just be the most important element of your teen's high school experience. Instead of graduating from high school with a shrug of the shoulders and a sigh of, "Well, I guess I need to figure out what I want to do with my life now..." your teen should be intentionally exploring areas of interest, strength and talent. He or she should be seeking God, seeking wise counsel from trusted people, and researching various job fields.

This one semester class will help your student understand what types of careers suit them best by: exploring careers and the educational and on the job requirements, learning how to create a resume that captures worthwhile experiences before their first paying job, writing successful cover letters, completing a career project and listening to in-class speakers share about their career paths and current jobs. Our speakers will be from many different career paths including technical, entrepreneurial and degreed positions.
