

Class Name: SAT Math Prep
Block 4 (12:35-1:30)
Fall & Spring 2024-25

Tutor: Grecia Fenton

Grade Level: 10th-12th

Course Description: This course will review all the core mathematical concepts and skills needed to succeed in higher level mathematics in college and standardized tests such as the SAT and ACT. Significant time is spent on SAT level problems, but we will also review some of the fundamental content needed to understand those questions. In addition to math skills, students will practice proven test-taking strategies and learn the most common mistakes students make as well as tips on how to interpret the SAT math questions by taking actual SAT math tests to better prepare the student for the test.

Prerequisites: Algebra 2 and Geometry

Textbooks Required:

The College Panda's SAT Math: Advanced Guide and Workbook (2nd edition)

The College Panda 10 Practice Tests for SAT Math (1st edition)

Supplies required: class note/homework notebook, graph paper

Materials fee: \$0

Maximum # of students: 15

Minimum # of students: 3
