

Tutor: Gina Zverev

Class Name: Intro to Logic

Grade Levels: Grades 5-9

Class Description: This is a two-semester course designed to: teach students to recognize different kinds of fallacies and common errors in reasoning. Students will build critical thinking skills, understand what critical thinking is, be given tools for opposing viewpoints, and explore the scientific method. Students are encouraged to think critically and do so through variety of logic puzzles, games, and activities. The year concludes with a fun project of the student's choosing that could be a science fair project or something similar.

Prerequisites: None
